

Financial Statement Analysis — Tata Consultancy Services Ltd.

Listed-company exercise for the Bluestock Data Analytics prerequisite | FY2025–26

Company context

TCS is used because the assignment requires a listed company with public financial statements. TCS's investor-relations site identifies Tata Consultancy Services Limited as NSE:TCS and publishes its annual reports and financial statements.

Key figures

Metric	FY2025	FY2026	Change
Revenue from operations	■255,324 cr	■267,021 cr	+4.6%
Profit after tax	■48,553 cr	■52,820 cr	+8.8%
Net worth	■94,756 cr	■107,240 cr	+13.2%
EPS	■134.19	■145.99	+8.8%

Income statement

Revenue increased 4.6% in FY2026. Profit after tax increased 8.8%, which means profit grew faster than revenue during the year. TCS reports FY2026 operating margin of 25% and net margin of 19.8%.

Balance sheet

The annual report shows net worth rising from ■94,756 crore to ■107,240 crore. The reported ten-year trend also shows a substantial long-term increase in revenue and net worth.

Ratio calculations

FY2026 net margin $\approx 52,820 \div 267,021 = 19.8\%$. A simple year-end current-ratio calculation is approximately **2.23** using current assets of ■135,705 crore and current liabilities of ■60,914 crore. Approximate ROE using average FY2025/FY2026 net worth is **52.3%**.

Cash flow and interpretation

TCS reported strong operating cash conversion in FY2026. For an analyst, the useful lesson is to connect the P&L, balance sheet and cash-flow statement: profit growth matters, but the analyst should also check whether the business is generating cash and maintaining a sound financial position.
